It is created in the same imaginative style and Intricate detailBy Jackie CooperIf you loved Angie Grace's coloring book Balance you are going to love this coloring book Angie has created, in the same imaginative style, with the same intricate detail that made Balance a best seller.This book is full of captivating, flowing, meticulously detailed, flawlessly balanced, intricate concentric patterns in circle form that will inspire you to color every single one.The illustrations in this book bring out your imagination, stimulate creativity, and inspire you, plus as you become engaged in the enjoyable activity of Coloring; it calms you and almost immediately starts to reduce your stress level.1. This lovely square book is 8 ½ "x 8 ½ ", with 50 (6 ½" to 7") circular, intricately detailed illustrations, printed one per page, (the back side of each page is blank).2. I tested Fiskars Gel Pens, Crayola and Prisma colored pencils: The colors lay down bright and smoothly making this book a joy to color. Plus the Fiskars Gel Pens do not bleed through the paper.4. Irma Scribbler Get Ink Pens, Sharpie ultra fine markers, Pentel fine point markers, Bic Mark it ultra fine, and Triplus Fineliner markers leak through the paper, place a piece of paper behind the page you are coloring and leave it there until your picture is dry to prevent damage to the next picture.5. The illustrations in this book are the same size as the illustrations in many full sized coloring books.6. The illustrations end 3/4inch from the binding, so there is plenty of room to take this to an office supply store and have them cut off the binding if you want the pictures out of

the book. I personally use my box cutter to remove pages from coloring books, I place a piece of cardboard under the page I want to remove, use a ruler to get a straight cut and cut the page out. With these books you can also heat the binding with a hair dryer to loosen the glue and remove the page. 7 of 7 people found the following review helpful. Love Love Love By Kindle Customer I really enjoy coloring with my gel pens in the Angie Grace books. I bought this one because I have been enjoying 'Balance' so much. It is so pleasurable to spend a bit of time after dinner each evening when watching tv or just relaxing after work. No stress, and it is just for me. Highly recommend Angie Grace. The ink won't bleed into the next page and the designs are only on one side of the page. None of the designs are near the middle where the binding is, so all of the design is easy to color. I can trust that this line of coloring books will always be the best. 2 of 2 people found the following review helpful. Gel pen users will love books by Angie Grace By L. Rocksvold one of my most favorite creators of these books. Most of them are more of an intricate design. lots of mandala styles. Perfect for gel pens overall as many of the books have basically huge pattern spaces that would simply use too much gel ink. They are single sided so you do not have to choose which one to color. ONLY THING that would make this truly ideal would be if the pages were serrated/perforated so that I could pull out each page. I like to use a sketch board (Artist Tote Sketchboard 13 Inch X 17 Inch) that I also purchased on . I have several of her books now and very much enjoy them - pic is from one of her books on my sketch board. lol i just reordered the same ones i originally ordered as each time I do them I can use any color combo I choose....I just like the format and smaller more intricate patterns

Colorists around the world treasure the calm and relaxation they've found while coloring Balance, Angie Grace's first title in her Extreme Stress Mender series.
