Even the predators look like they want to befriend youBy JillybeanWhen you flip to back, you just get a cut out PIECE of what the whole picture looks like. This book is adorable. Some of the pictures are collages and some have one main theme. There are flamingos, eels, sharks with grins, cats that are supposed to be pirates I guess, octopus,fish, crabs, turtles, storks, some type of coral reef image, and all sorts of creatures that are friendly even if they're normally predators. It is printed on one side, and the lines are distinct (not gray, feathered out, or skipping).0 of 0 people found the following review helpful. One-sided pages allow for more versatile mediaBy moriCute and fun sea-themed pages to color, with varying levels of detail to color. I love

that each page is one-sided, so you can color them in with even markers or paints (not just crayons or colored pencils) without ruining any design on the opposite side. Great idea!0 of 0 people found the following review helpful. Fun, silly, and fantastical!By Tracie H.Loved this fantastical sea creature coloring book.
