Dave Wodnicki : Coffee Quest before purchasing it in order to gauge whether or not it would be worth my time, and all praised Coffee Quest:

Dave Wodnicki is just a regular guy who likes the simple things in life, like a sunny morning and a nice full-bodied

cup of coffee. Having spent all of his working life in the high-tech world slurping down countless cups of bad coffee, Dave started looking for something better than just a caffeine fix. A 'flavor' fix was what was needed, and the quest to find it was begun. While on his quest, new pathways were revealed, which led him to the present culture of coffee aficionados. The coffee trail opened up to reveal new views into the world of art and culture. Yet another path led to his awareness and appreciation of agriculture, nutrition, gourmet chefs, and the modern foodie society whose experience and enthusiasm prompted him to pay much closer attention to matters of food and the drink called coffee. This is the story of his adventure through the maze of mediocre mud to the finish line of fantastic flavor. This is the search for the perfect cup of joe...a Coffee Quest.
