IN By Kindle Customer Here is another sample of the older, irascible, cantankerous, irreverent Mark Twain. He gets more interesting with each sample of questioning the widely accepted (during his time) ideas and ideals of morality, religion and status quo. You probably never knew this Mark Twain existed. He questions the Bible, perceptions of God, angels and just about everything else in scripture. He does this by having God send his favorite angel, Lucifer (yes...the one who falls from grace and becomes Satan) to observe His latest experiment, man, to see how the experiment is coming along. Lucifer reports his findings to God through letters he writes from his observation post, Earth. Hence the title of one of the most keen and brutally critiqued actions of creation.

By Herbert J. Bailey A favorite gift of mine to my friends. The book should be re read with an open mind. After all it is just Lucifer writing letters back to Gabriel in Heaven telling him how screwed up the world we live in has become, and what he thinks of humans.

By Pigasus For me this was a revisit to a book I first read many years ago. Some of what I remembered was not included but overall it was well worth the re-read. Mark Twain's sense of humor and ability to prod some thought from his readers is showcased. It might horrify some of the deeply religious (I am not) but if you can't laugh at Twain's work that is your

loss.
