I must concede that I did learn some handy things throughout (I was unsure at first what to expect--actual helpful ideas or mostly satire). Very simple and easy to understand. The graphs and images were a welcome change to the mostly repetitive structure of the book. But yeah, overall a more informative read than was expected, and I could imagine going back to certain sections of this as starting points, in the right situation of course.Caught a typo on page 134 ("baby power" instead of "baby powder", though I appreciated the imagery of a baby summoning its powers to remove all the sand from my body after a day at the beach)I do value the work that was put into the research and I imagine the authors had a swell time experimenting and concluding, which is cool as heck. BlevinsLife Hacks Handbook : How to deal with the worst case situations of the 21st century is by Maria Llorens and Hugo Villabona. This is a book of suggestions to help your life become easier. The list of topics ranges from "How to decide what to watch on Netflix" to "How to avoid looking like a fool at the water fountain" to "How to avoid people". It is an interesting book and one you would have to have on hand for future reference to get the best use out of it. The authors did a lot of research to give an answer to these situations. It is not meant for you to follow it closely; but to give you a direction to start in to solve your own problems. There are some very interesting suggestions.0 of 0 people found the following review helpful. great visuals and useful adviceBy AKThe book is easy to read and to quickly move to the relevant topic. The publisher, Mango, has done an excellent job with the colors and layout. I look forward to seeing more books with colors and graphics like this one! Reading books needs not be only black and white, and this feels like the next generation of books.

Life is hard. Your craft beer is out of season. Your M.A. degree has not helped in your part-time barista job. Your Pinterest projects always fail. This century is just one giant disappointment. Well, not anymore! Life Hacks Handbook- How to Deal with the Worst Case Situations of the 21st Century will solve your worries. This is the definitive book when it comes to our first world problems. Overflowing with how-to illustrations, infographics and heavily researched insight on everything that probably will go wrong in this century. Life Hacks Handbook takes its inspiration from Stephen Colbert's I Am America and mashes it with Chicken Soup for the Soul, to create a quasi-solution to problems that might not or should not exist. Hack on!
