All babies are gods and goddesses. We know that; you know that. But many new parents are at a loss and can't see the divine through the tears, the sleep deprivation, the dirty diapers, and the loads and loads of poop. Life Is Poop is a view of parenthood from the baby's perspective. Observations abound on subjects such as: the outfits, the safety measures, the doctor's visits, the food, the family pet, the relatives - you get the picture. The book is for parents, parents-to-be, baby shower attendees, grandparents, and babysitters. Its blunt observations are paired with humorous illustrations that everyone who has ever been within smelling distance of a baby can relate to.
