The author found a sort of redemption through the Michigan forest, not in a New-Age way, but in a very straightforward, Michigan way. As an active member of a land conservancy, I particularly enjoyed his chapters on land trusts and on handling invasive species. He points out what seems to have escaped many otherwise gentle people: for millenia, the land has survived many disasters and flourished, without man's help burning, poisoning, and bulldozing vast tracts in the name of ecological purity. I took this book out of the library and then bought a copy, so I could pass it around to members of the conservancy. My only reservation is that the book tries to be several things at once: a memoir of personal development, a personal history of his family, a compendium of Michigan trees and their uses in pioneer days, the remnants of these old days still visible in the Michigan countryside; the problems that face land conservation today; various sick people who burn old barns or forests; and his own young family. While he handles many of these quite well, they might have held together better as the subject matter of several books. All in all, a worthwhile read, especially to anyone who knows and loves the woods and waters of Michigan. 0 of 0 people found the following review helpful. Five Stars By D. A new voice reveals the unique character of the upper Midwest In the spirit of other writers who share an affinity for the natural world---authors such as Robert Frost, Emerson, and Bill Bryson---Looking for Hickories is Tom Springer's ode to the people, natural beauty, and lore of the Midwest, a place where bustling communities neighbor a fragile mosaic of quiet woods, fertile meadows, and miles of farmland. Touching and humorous by turns, Looking for Hickories captures the essence of the upper Midwest's character with subjects particular to the region yet often universal in theme, from barn building to land preservation to the neglected importance of various trees in the landscape. Like Frost's best poems, Springer's essays often begin with delight and end in wisdom. They mingle a generosity of spirit and the childlike pleasure of discovery with a grown-up sense of a time and a place, if not lost, then in danger of disappearing altogether---things to treasure and preserve for today and tomorrow.
