From Academic Press : The Eye's Aqueous Humor: From Secretion to Glaucom Vol.45 before purchasing it in order to gage whether or not it would be worth my time, and all praised The Eye's Aqueous Humor: From Secretion to Glaucom Vol.45:

This volume presents a basic consensus of how the aqueous humor is formed and exits through the trabecular meshwork and canal of Schlemm. It presents a timely update to current knowledge of the molecular transport

mechanisms which underlie aqueous humor dynamics. In addition, it provides a concise description of the clinical approaches used for assessing these basic transport processes. The book emphasizes the phenomenon of the diurnal rhythm of aqueous humor formation, from both the clinical and molecular points of view. This phenomenon provides the major indication that aqueous humor secretion is regulated. Key Features* Introduces the mechanisms of aqueous humor formation and outflow* Describes the clinical study of aqueous humor dynamics* Exposes the research approaches currently applied* Emphasizes the diurnal rhythm of aqueous humor secretion* Provides awareness of unanswered questions
