From Academic Press : The Eye's Aqueous Humor, Volume 45: From Secretion to Glaucoma (Current Topics in Membranes) (Vol 45) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Eye's Aqueous Humor, Volume 45: From Secretion to Glaucoma (Current Topics in Membranes) (Vol

45):

This volume presents a basic consensus of how the aqueous humor is formed and exits through the trabecular meshwork and canal of Schlemm. It presents a timely update to current knowledge of the molecular transport mechanisms which underlie aqueous humor dynamics. In addition, it provides a concise description of the clinical approaches used for assessing these basic transport processes. The book emphasizes the phenomenon of the diurnal rhythm of aqueous humor formation, from both the clinical and molecular points of view. This phenomenon provides the major indication that aqueous humor secretion is regulated. Key Features* Provides an introduction to mechanisms of aqueous humor formation and outflow* Exposes the reader to research approaches currently being applied* Offers an introduction to clinical study of aqueous humor dynamics* Coverage emphasizes diurnal rhythm of aqueous humor secretion

About the Author Edited by Arnost Kleinzeller, Dale J. Benos, and Mortimer M. Civan
