Tom Tomorrow : The Future's So Bright I Can't Bear to Look before purchasing it in order to gage whether or not it would be worth my time, and all praised The Future's So Bright I Can't Bear to Look:

But I find it harder to slog through the cartoons in a collection because this is a time of more stupidity, more partisan vitriol and more poisonous politics than even the Nixon Administration. Hey, Nixon did go to China. He also created the EPA. He was a fascist to many of the Left, a Red Chinese Mole to many of the Right. He was the spirit of these times, yet now seems strangely old-timey and milder than today's demagogues in office and the media, let alone on the web where every one has their say whether they should say anything or not.Chocolates quickly lose their appeal if you sit down to scarf down a whole box, and so does a jar of olives, which are, as they say, an acquired taste that some do not acquire.I am glad to have the Tom Tommorrow perspective, insight, depth, intelligence, but I have to read the cartoons one or two at a time, the way they were published in print and online. Tom Tomorrow answers absurdity that takes your breath away with a reductio ad absurdam that turns the foolishness around and leads you back to common sense and fact-based thinking. How many warriors of the Partisan Clone Wars can do that? Very few on any side of complex issues. Go for it, Little Penguin Guy!0 of 0 people found the following review helpful. BrilliantBy gshafferTom Tomorrow is the best political commentator in the U.S. He is better than anyone, except maybe Paul Krugman, at pointing out precisely where the emperors have no clothes. You should buy any book of his and sign up for his weekly cartoon/commentary, which is

simply brilliant. I am putting this review in for all his books because they all deserve to be read. The more recent ones are necessarily more current if that helps in choosing what to buy. 0 of 0 people found the following review helpful. Another great Tom Tomorrow collection By Arthur Maglin Tom Tomorrow's cartoon collections are good way to remember the controversies of yesteryear. You'll be surprised at how much the past reminds you of the present.

Welcome to a world where George Bush and Dick Cheney are secretly radical leftists trying to destroy the Republican party from within; where Jeffrey Dahmer is a celebrated conservative pundit and the author of such instant bestsellers as *Liberals: Kill Them and Eat Them*; and where Richard Perle hosts the NeoCon Game Show, awarding fabulous prizes to the contestant with the most outlandishly wrong answers. Welcome to the world of Tom Tomorrow, whose subversive new anthology skewers the absurdities of American political culture -- and the depravities of the Bush era -- with the sardonic wit and keen insight his many loyal readers have come to expect. From Hurricane Katrina to the latest presidential campaign, these cartoons provide an unflinching look at where we've been -- and just how bright we can expect the future to be.
