Want to neutralize them for your kids without seeming like a total douche? Then this is the book to drop on them when they're young. While it seems, on the surface, to be about two dogs who have found religion and try to spread it, everything is not what it seems to be. In a short,

breezy style, the authors quickly expose the Ding Dong Religious for what they are. Bonus points -- your religious grandparents will think it's just adorable, and they won't get the joke...0 of 0 people found the following review helpful. The most confusing coffee table book ever...By DanielThe Good News is a very quick read with wonderful images sprinkled throughout. Like many children's stories, the end can be predicted from the first page, (with a little Joyce thrown in for any Finnegans Wake fans...) and the tension builds in both the writing and the images. This is not a book for the red states, but if you want the physical embodiment of dry humor on your coffee table, this is for you!

A children's story for adults about two newly converted dogs going door to door preaching the good Lord's message.
