Roger Coghill : The Healing Energies of Magnets before purchasing it in order to gage whether or not it would be worth my time, and all praised The Healing Energies of Magnets:

Before you scoff at this title...By LynelleFirst, recognize that the author of this book is a "Cambridge-trained research biologist" who has about 30 years of experience and studies in electromagnetic energy and the effects on humans, animals and the earth itself. The first book by him that I bought is from 2000, The Healing Energies of Light...also very well researched and fascinating in its scope of the use of light, past and present. I loaned out my book on "Magnets", (when will I ever learn not to loan out books!?)and that's why I'm ordering another one. Anyone interested in 'energy medicine' will find these two books extremely informative, helpful and reassuring. The author wrote other books, but I do not have them...yet. AND, if you really want to stretch

your imagination---scientifically---this author is also included in a DVD documentary called The Living Matrix. Gene Roddenberry would be proud.0 of 0 people found the following review helpful. Five StarsBy Donald E. DeHartA great foundation book. Easy reading! Thanks!
